MARISEAL® 710 AQUA

Polyurethane Primer, Water-based

Maris Polymers®

POLYURETHANE SYSTEMS

TECHNICAL DATA

Product description

The MARISEAL® 710 AQUA is a water-based, transparent, semi-rigid, deep penetrating, one component, quick drying polyurethane primer.

The MARISEAL® 710 AQUA consists of flexible, water-based polyurethane resins (dispersion), without the addition of inferior acryl resins and other admixtures.

Used as a primer in waterproofing applications on absorbent surfaces in combination with the MARISEAL® AQUA SYSTEM.

The MARISEAL® 710 AQUA is based on the innovative **PUD-Technology™** of MARIS POLYMERS SA.

Uses

The MARISEAL® 710 AQUA is used as a primer for the water-based polyurethane waterproofing system on absorbent surfaces like:

- Concrete
- Mortar
- Plaster
- Wood, etc.

The MARISEAL® 710 AQUA can be used in combination with the MARISEAL® AQUA SYSTEM (MARISEAL®250 AQUA, MARISEAL® 400 AQUA, etc.)

Advantages

- Simple application (roller or airless spray).
- Water Based
- Quick drying
- Deep penetrating
- Excellent anchoring to absorbent surfaces.
- Heat and frost resistant
- Stops the creation of dust.
- Maintains its mechanical properties over a temperature span of -30°C to +80°C.
- Low VOC content <100 gr/l

Consumption

0,2 kg/m² applied in one or two layers.
 This coverage is based on application by roller onto a smooth surface in optimum conditions. Factors like surface porosity, temperature and application method can alter consumption.

Colors

The MARISEAL® 710 AQUA is supplied transparent.

PUD Technology™: The Green revolution in Polyurethane

The MARISEAL® 710 AQUA is based on the innovative **PUD Technology™** of MARIS POLYMERS, which enables, long-chain polyurethane macromolecules to be incorporated in a water medium, forming stable dispersions.

The **PUD Technology™** based products, have the advantage that they offer the high level properties of solvent based products, in an ecological, consumer and environmentally friendly, water-based, low VOC, no ADR transport product.

The **PUD Technology™** is the entry to the Green revolution in Polyurethane based products.

Technical data*

PROPERTY	RESULTS	TEST METHOD
Composition	Polyurethane pre-polymer dispersion.	
Adhesion to concrete	>1,5 N/mm ²	ASTM D 903
Hardness (SHORE A Scale)	>80	ASTM D 2240
Resistance to Water Pressure	No Leak (1m water column, 24h)	DIN EN 1928
Service Temperature	-30°C to +90°C	Inhouse lab
Water Vapor Permeability	>15 gr/m ² /day	ISO 9932:91
Tack free time	90 min	Conditions: 20°C, 50% RH
Overcoating time	3-4 hours	
Final Curing time	10 days	

CONSTRUCTION

Application

Surface Preparation

Careful surface preparation is essential for optimum finish and durability.

The surface needs to be clean, dry and sound, free of any contamination, which may harmfully affect the adhesion of the membrane. Maximum moisture content should not exceed 6%. Substrate compressive strength should be at least 25MPa, cohesive bond strength at least 1.5MPa. New concrete structures need to dry for at least 28 days. Old, loose coatings, dirt, fats, oils, organic substances and dust need to be removed by a grinding machine. Possible surface irregularities need to be smoothed. Any loose surface pieces and grinding dust need to be thoroughly removed.

WARNING: Do not wash surface with water!

WARNING: Do not use a metal-ball blasting machine to grind the surface, because the heavy metal-ball impacts destroy the cohesion of the concrete surface and lower its stability.

Priming

For best results, the temperature during application and cure should be between 5°C and 30°C. Low temperatures retard cure, while high temperature speed up curing. High humidity may affect the final finish.

Apply the MARISEAL® 710 AQUA by roller or brush, until the surface is covered. You can use airless spray allowing a considerable saving of manpower.

After 3-4 hours and while the primer is still a bit tacky, apply the water-based polyurethane coating.

RECOMMENDATION: If the surface is very brittle, like lightweight concrete or porous cement screed, apply two layers of the MARISEAL® 710 AQUA.

Packaging

MARISEAL® 710 AQUA pails should be stored in dry and cool rooms for up to 18 months. Protect the material against moisture and direct sunlight. Storage temperature: 5°-30°C. Products should remain in their original, unopened containers, bearing the manufacturers name, product designation, batch number and application precaution labels. PROTECT FROM FROST.

Safety measures

Keep away from children. Do not use empty containers for food storage. See information supplied by the manufacturer. Please study the Safety Data sheet. PROFESSIONAL USE ONLY.

Our technical advice for use, whether verbal, written or in tests, is given in good faith and reflect the current level of knowledge and experience with our products. When using our products, a detailed object-related and qualified inspection is required in each individual case in order to determine whether the product and /or application technology in question meets the specific requirements and purposes. We are liable only for our products being free from faults; correct application of our products therefore falls entirely within your scope of liability and responsibility. We will, of course, provide products of consistent quality within the scope of our General Conditions of Sale and Delivery. Users are responsible for complying with local legislation and for obtaining any required approvals or authorizations. Values in this technical data sheet are given as examples and may not be regarded as specifications. For product specifications contact our R+D department. The new edition of the technical data sheet supersedes the previous technical information and renders it invalid. It is therefore necessary that you always have to hand the current code of practice.

* All values represent typical values and are not part of the product specification.
